Chairman's Speech

Dear Shareholders,

I am happy to report that our financial and operational performance in FY 2016-17 was commendable in a challenging business environment. Our focus on delivery and growth continued to yield results in what was a difficult year for the sector where we operate. Our Company generated PBDIT of Rs. 5018 lakh for the year. Our strong balance sheet and conservative financial profile is reflected through our strong credit rating.

It was yet another difficult year for the global economy, characterized by low growth and geopolitical uncertainties. In India, rural demand continued to be sluggish in the early part of the year. The overall market showed signs of recovery in the latter half of the year but faced a temporary slowdown in November due to demonetization. India is on the growth path.

I believe that the forthcoming year holds promise of improvement as far as investment momentum is concerned. The Government's focus on a slew of recent initiatives like, make in India, Smart cities, Railways, Irrigation, highway projects, water revitalization, rural and urban development, affordable housing projects, housing to all by 2022, focusing on improving rural infrastructure, aiming for a smooth flow of agriculture credit and funding under various irrigation schemes and other growth-stimulating infrastructure, places your company in a favorable position. We are future-ready to capitalize on the emerging opportunities.

The introduction of GST is a significant reform measure and will overtime help India in simplifying tax structure and compliance, aligning it with practices in developed countries.

By virtue of our engagement in the core sectors of the economy – agriculture, infrastructure and construction, our businesses make a unique contribution to the growth and development aspirations of the nation.

A sharp focus on marketing, our vibrant customer relationship, coupled with continuing investments in R&D is the mantra to ACE next level of growth. The Company believes in providing products suitable to the market requirements. R&D is providing the impetus to take forward this mindset. Our dedicated R&D Centers have sharpened our focus on various innovative product categories and helped us launch new products that are in tune with customer needs. We are alive to the realities of technological challenges. Our R&D teams are working on all these areas to ensure that ACE always remains the forefront of innovation and keep breaking new paths in customer satisfaction.

Our Social Responsibility and Sustainability efforts continue to win us laurels. We undertake these with same beliefs and conviction as we do our commercial activities. What makes us different from others is that we have made these efforts intrinsic to our commercial activity or strategy, and not something that we are forced to do by regulatory mandate.

We invested in creating capacities and expanding our manufacturing base, products, and product support network. This was done to be able to cater to demand as it picked up.

In the year 2017-18, we will continue to strive to set higher benchmarks of performance and strengthen our engagement with our stakeholders. Our strategy is in place to build stronger partnerships among our suppliers and dealers, broaden our distribution network and expand our coverage to maximize reach. We are working towards cost optimization, lean processes and proficient operations to enhance our profitability.

We are looking forward to continue on our mission of generating sustainable value for our stakeholders. I would like to place on record my sincere appreciation to the Board of Directors for their guidance. I would like to express my gratitude to all our stakeholders for their continuing faith in ACE.

With best wishes,

Sincerely,

Vijay Agarwal

Chairman and Managing Director

Management Discussion and Analysis

❖ INDUSTRY STRUCTURES AND DEVELOPMENTS

India's economy gained momentum in last fiscal, robust urban consumption and public investment have supported growth, despite dismal global conditions. Despite an expected decline in the growth rate owing to slowdown in manufacturing, decline in budgetary capital expenditure and demonetization, India is expected to continue as the fastest growing large economy.

The country's economic growth is facing challenges such as subdued manufacturing, lower exports of services, and lower private capital expenditure. However, due to favorable indicators such as moderate levels of inflation, reduced Current Account Deficit (CAD), fiscal consolidation and transitory impact of demonetization, the Government expects India's GDP to expand at a growth rate between 6.75–7.5 % during 2017-18. Cheap borrowing costs and fading impact of demonetization could increase the private consumption and thereby further drive economic growth.

India's construction equipment industry, which was down in the dumps during last four years, has shown signs of recovery from 2016, on the back of increased highway construction; improved government spending on water revitalization and building new cities across the India. Growing public & private infrastructure, FDI reforms for construction sector, highway

projects and growing economy has led to the overall surge of construction equipment market in India.

India's construction equipment market is projected to reach 131 thousand units by 2022. The market declined during 2012 to 2016 owing to factors such as delay in project clearance issues and land acquisition delays. However, in coming years, owing to several construction projects in pipeline, the market for construction equipment is expected to witness growth led by surge in construction vehicle segment, followed by earthmoving segment. The Indian construction equipment industry is projected to exhibit a cumulative annual growth rate of 19% during 2013-2018.

The need for boosting infrastructure development has been core to the present Government of India's policies. There have been reforms to boost sectors like roads, railways, power distribution and rural and urban developments. Further initiatives by the government to develop 100 new smart cities and setup industrial hubs in the country through "Make in India" campaign would boost the overall construction equipment market in the country. Construction vehicle segment is leading the revenue market share on account of wide deployment in mining and construction sector.

The recent progress in highway road building activity and coal mining auction augurs well for the future. There is cautious optimism that by 2018-19, the industry will get back to an output level of 70,000 units that was achieved in 2011-12.

The Union budget for FY 2018 has allocated for infrastructure development Rs.3,96,135 crore being 14% increase compared to last year. The Union Budget has proposed to assign infrastructure status to the affordable housing projects, which is aligned with the government's aim to provide "housing to all" by 2022. The proposed positive changes for affordable housing and overall for the entire Real Estate sector will have a positive multiplier effect on many other including ACE tower cranes.

The Indian Government has heavily invested in the development of roads, railway tracks, airports, and overall infrastructure development, which involves the use of excavators, loaders, and other such heavy machinery. The key market players design and develop smart, internet-enabled, fuel & energy-efficient machinery, thus accelerating the market growth.

The Earthmoving and Construction Equipment (ECE) industry is back on track. This growth in the ECE industry is primarily driven by the roads and highways sector. This growth in the sector needs to be sustained, and a lot depends on the execution of the projects that are being announced.

The implementation of Goods and Services Tax (GST) is expected to improve tax compliance and governance, and will provide an impetus to the investments and growth in the country.

Despite the focus on industrialization, agriculture remains a dominant sector of the Indian economy both in terms of contribution to gross domestic product (GDP) as well as a source of employment to millions across the country. Agriculture plays a vital role in the Indian economy. Over 70% of the rural households depend on agriculture as their principal means of livelihood.

The Agriculture and Allied sector witnessed an improved rate of growth in FY 2017. This is largely on account of a normal monsoon throughout the country for the current fiscal, as against sub-par monsoon during in FY 2015 and FY 2016.

Focusing on improving rural infrastructure, the government has increased allocation on various schemes such as MNREGA, besides aiming for a smooth flow of agriculture credit and funding under various irrigation schemes.

Recognizing the importance of Agriculture Sector, the Government took a number of steps for sustainable development of Agriculture. These steps include enhanced institutional credit to farmers besides other steps. The Indian agriculture sector is expected to grow with better momentum in the next few years owing to increase in investment in agricultural infrastructure such as irrigation facilities, warehousing and cold storage. Factors such as reduced transaction costs, time and fiscal incentives will also contribute to this upward trend.

With the projected forecast of good monsoons after a gap of two years, the demand for tractors, harvesters will increase and will help your Company as it will result in robust growth in tractor volumes as well new products like track harvesters, rotavators launched in the recent past.

As far as the growth of equipment manufacturers (cranes,

construction, material handling and agri equipments) is concerned; it is linked with growth of infrastructure, real estate, agricultural and indirectly with the growth of Indian economy. It requires expertise, in terms of technology, design and providing customer satisfaction. Its potential and market is huge; however, only companies who would be able to provide good quality products at most competitive price will survive. The Company's ACE brand has emerged as brand for reliability and has been able to win the customer loyalty in all these years. ACE will continue its successful stint in the industry, through providing good quality products at most reasonable prices and complete customer satisfaction by its strong distribution and service network.

❖ OPPORTUNITIES

The end-users are demanding world-class technology for better fuel efficiency, higher productivity and profitability; ACE come up with innovative solutions to meet customer expectations.

Demand for construction equipment is likely to rise as a result of growth in traditional end-user industries, including construction and mining. Thus, the ACE in India can tap these markets. Growing urbanization is also set to positively impact the growth of ACE.

Government of India's Make in India campaign, 100 'Smart Cities' project and 'Housing for All' scheme covered in over

300 cities would also provide the necessary boost to the demand for construction equipment in the years to come.

We believe that our proactive steps in providing best solutions to our customers and implementation of our strategies have prepared us for growth as demand picks up once the consumer sentiments improve with the expected revival of the infrastructure industry.

ACE continues to focus on various strategies and initiatives to overcome challenges. These include consolidation of new generation cranes in the targeted market segments. ACE maintained its market leadership position and is well positioned to achieve growth in terms of volumes and market share through better service levels and by providing the best of technology at an affordable price.

In the Agri segment, Company is looking at significant product expansions and improving its market share. We have increased our presence in most of the states. We are consequently, focusing on providing customers a complete range of crop solutions. To implement this Company has also started production of Harvesters, Rotavators etc.

❖ **THREATS**

- Many new construction equipment players have emerged in the country and many more will hit the ground in the coming years. Thus, the construction equipment companies in India will have to face stiff competition.

- While construction equipment manufactures in India will continue to put in the market increasingly sophisticated machines in greater numbers, the industry might have to face an increasing shortage of trained manpower to operate and service these machines, thus impacting sales.
- Continued threat of raw material price volatility translating into pressure on margins during a rapid increase in raw material prices.
- Weak currency resulting in pressure on margins.
- Any change in the government policy or its budgetary allocation to the infrastructure sector will have a major impact on Company's business.
- Unforeseen business losses.

❖ **SEGMENT WISE OR PRODUCT WISE PERFORMANCE**

Company operates mainly in three segments i.e. Cranes, Material Handling/Construction Equipment and Agri Equipment. The Company has a balanced approach to the Cranes, Material Handling/Construction Equipment and Agri Equipment/Tractor, which helps us in capitalizing on our strengths in all three segments and to respond to market fluctuations and customer strategies.

During the financial year 2016-17, Cranes revenues increased by 19.46%, Material Handling/Construction Equipment division revenues increased by 62.13% as compared to previous year whereas Agri Equipment/Tractor division revenues were down by 0.52% in 2017 as compared to 2016.

Cranes division profits increased by 3% because of various cost initiatives taken by the Company.

Material handling / Construction equipment division profit increased by 695% because of increase in revenue and various cost initiative taken by the Company.

Agri Equipment Division profits increased by 173% mainly due cost initiative taken by the Company.

❖ **OUTLOOK**

The construction equipment industry is going to see a change in the coming years due to modifications in the infrastructure, construction and mining sectors in India. India's infrastructure industry has the biggest potential for growth and

opportunities for investment. We see the construction industry on the rise and foresee a positive trend in equipment purchase with more players entering into the aggregate industry. Some factors that are currently driving the demand for construction equipment in India include heavy investments in various infrastructural projects by public and private enterprises in areas like road construction and its maintenance, ports, power plants, telecommunication sector, urban infrastructural developments, smart cities, clean India and fast train projects etc.

The growth is back in India and government financed infrastructure outlays have started, especially in highways, housing, and railways. The restrictive regulations are being eased or removed, industry sentiments are improving and given the focus on infrastructure that the current Government has, we expect to see improvements on the ground for the infrastructure development sectors.

However, most markets will remain competitive but ACE due to its good customer relationship will penetrate the market and will gain market share.

Your Company recognizes the tough times and we have already initiated significant cost reduction efforts, optimization of working capital requirements in order to minimize financing costs. These coupled with other operational executions will enable the Company to register better performance in the coming years. The efforts on cost

optimization and process with improvement will continue.

The Management anticipates improvement in the economy and is confident that when the revival happening, with right focus and proactive approach your Company will be able to capitalize on the future opportunities.

FY 2018 will be a year for reviving the business with process improvement initiatives which should see better performance of the Company.

❖ RISKS AND CONCERN

The Company's ability to foresee and manage business risks is crucial in achieving favorable results. The Company operates in an environment which is affected by various risks, some of which are identifiable and controllable. Some others are unexpected and cannot be controlled. Under these conditions, proper identification and management of risks is very important in determining the ability of the organization to sustainability create value for its stakeholders.

The impact of the key risks which are listed below has been identified through a formal process by the management. However, the Company has been taking appropriate measures to mitigate these risks on a continuous basis. Some of the risks that are potentially significant in nature and need careful monitoring are listed hereunder:

- **Resource Risks :** This risk refers to the timely availability of resources – particularly raw material, spare parts, fuel and labor. It also includes the risk that the raw material prices might move adversely, variations in prices of steel and other commodities. Rising material costs affect profitability and competitiveness. The major impediments today faced by the construction equipment industry in raising the levels of productivity are the acute shortage of skilled manpower, both at worker and supervisory levels, as well as the lack of experienced construction equipment engineers. The industry as a whole needs to do a lot more to address the lack of talent. Dearth of right talent could restrict the industry growth leading to rise in costs and the success of projects may be compromised.
- **Risks from Competition:** In recent years, India's liberalized regime has created opportunities and also increased competition in the construction equipment business, which has seen significant interest of foreign

players, mean overseas companies winning work at the expense of local players or partnering with them. New competitors entering the market and the current competitors pricing more aggressively intensifies the highly competitive condition that already exists.

- **Risks from Suppliers** : A construction equipment company relies on innumerable third parties for timely supply of specified raw materials, components, equipment and services. Some events could result in the complete or partial failure of supplies or in supplies not being delivered on time. Supply disruptions may also be the result of excessive dependence on a single supplier.
- **Ability to pass on increasing cost** : Ability to pass on increasing cost in a timely manner depends upon the demand supply situation and competitive activities and there has been a general reluctance as seen in the past, to make significant price hikes.
- **Continued Economic Growth** : Demand of our equipments/ machines is dependent on economic growth and / or infrastructure development. Any slowdown in the economic growth affects our growth.
- **Foreign Currency Risks** : Exchange rate fluctuations may have an adverse impact on the Company.
- **Cyclical nature of the Industry** : The Company's growth is linked to those of the crane Industry, which is cyclical in nature. The demand for crane has a significant impact on the demand and prices of the products manufactured by the Company. A fall in the demand and / or prices would adversely impact the financial performance of the Company.

Agriculture Industry growth is dependent upon normal monsoons and availability of finance from public sector banks and NBFC. The Indian met department is predicting normal monsoon in the current fiscal. Tractor sales run the risk of demand drop in case of significant variations in the monsoons.

ANNEXURE-B

Report on the Internal Financial Controls under Clause (i) of Sub-section 3 of Section 143 of the Companies Act, 2013 ("the Act")

We have audited the internal financial controls over financial reporting of Action Construction Equipment Limited ("the Company") as of 31 March, 2017 in conjunction with our audit of the financial statements of the Company for the year ended on that date.

Management's Responsibility for Internal Financial Controls

The Company's management is responsible for establishing and maintaining internal financial controls based on the internal control over financial reporting criteria established by the Company considering the essential components of internal control stated in the Guidance Note on Audit of Internal Financial Controls over Financial Reporting issued by the Institute of Chartered Accountants of India. These responsibilities include the design, implementation and maintenance of adequate internal financial controls that were operating effectively for ensuring the orderly and efficient conduct of its business, including adherence to company's policies, the safeguarding of its assets, the prevention and detection of frauds and errors, the accuracy and completeness of the accounting records, and the timely preparation of reliable financial information, as required under the Companies Act, 2013.

Auditors' Responsibility

Our responsibility is to express an opinion on the Company's internal financial controls over financial reporting based on our audit. We conducted our audit in accordance with the Guidance Note on Audit of Internal Financial Controls Over Financial Reporting (the "Guidance Note") and the Standards on Auditing, issued by ICAI and deemed to be prescribed under section 143(10) of the Companies Act, 2013, to the extent applicable to an audit of internal financial controls, both issued by the Institute of Chartered Accountants of India. Those Standards and the Guidance Note require that we comply with ethical requirements and plan and perform the audit to obtain reasonable assurance about whether adequate internal financial controls over financial reporting was established and maintained and if such controls operated effectively in all material respects.

Our audit involves performing procedures to obtain audit

evidence about the adequacy of the internal financial controls system over financial reporting and their operating effectiveness. Our audit of internal financial controls over financial reporting included obtaining an understanding of internal financial controls over financial reporting, assessing the risk that a material weakness exists, and testing and evaluating the design and operating effectiveness of internal control based on the assessed risk. The procedures selected depend on the auditor's judgment, including the assessment of the risks of material misstatement of the financial statements, whether due to fraud or error.

We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our audit opinion on the Company's internal financial controls system over financial reporting.

Meaning of Internal Financial Controls over Financial Reporting

A company's internal financial control over financial reporting is a process designed to provide reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements for external purposes in accordance with generally accepted accounting principles. A company's internal financial control over financial reporting includes those policies and procedures that (1) pertain to the maintenance of records that, in reasonable detail, accurately and fairly reflect the transactions and dispositions of the assets of the company; (2) provide reasonable assurance that transactions are recorded as necessary to permit preparation of financial statements in accordance with generally accepted accounting principles, and that receipts and expenditures of the company are being made only in accordance with authorizations of management and directors of the company; and (3) provide reasonable assurance regarding prevention or timely detection of unauthorized acquisition, use or disposition of the company's assets that could have a material effect on the financial statements.

Inherent Limitations of Internal Financial Controls over Financial Reporting

Because of the inherent limitations of internal financial controls over financial reporting, including the possibility of collusion or improper management override of controls, material misstatements due to error or fraud may occur and not be detected. Also, projections of any evaluation of the internal financial controls over financial reporting to future periods are subject to the risk that the internal financial control over financial reporting may become inadequate because of

changes in conditions, or that the degree of compliance with the policies or procedures may deteriorate.

Opinion

In our opinion, the Company has, in all material respects, an adequate internal financial controls system over financial reporting and such internal financial controls over financial reporting were operating effectively as at 31 March, 2017, based on the internal control over financial reporting criteria established by the Company considering the essential components of internal control stated in the Guidance Note on Audit of Internal Financial Controls Over Financial Reporting issued by the Institute of Chartered Accountants of India.
